

# LOIPART

## SERVICE CONCEPT

The Loipart Service Concept agreement is tailor made for your needs. We can then offer a combination of different services. The concept is based on three major areas:

### CUSTOMER SELF-SERVICE SUPPORT

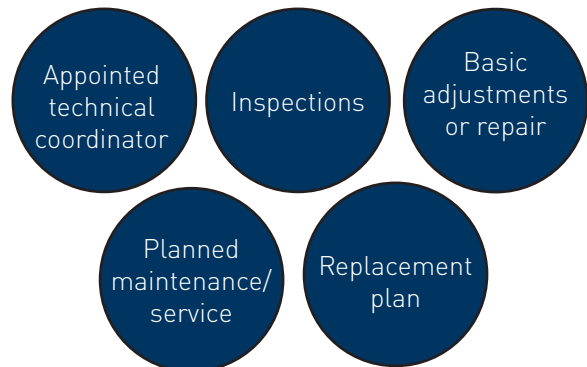

Loipart assists you in maintaining high availability of your products, as we take care of all planning and administration for you.

All contracts are managed by a technical coordinator acting as your personal single point of contact for technical, maintenance and budgeting support.

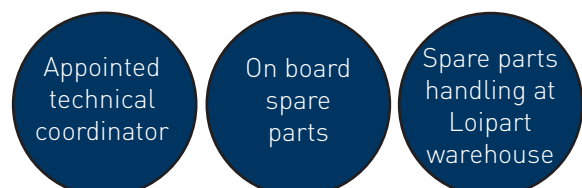

### LOIPART ON BOARD SERVICES

Through condition monitoring, planned and corrective maintenance and inspections we keep your products operable with a minimum of a down time and interference in your daily operation. Our services prolong the lifetime of your products.

### SPARE PART AVAILABILITY

With our generous stock policy we ensure spare part availability. We make sure your specified and vital spare parts are available when you need them.

For more information and questions please contact our VP After Sales, Mrs Katarina Munter
